

## Up-link Board

2\*10GE SFP+

MODEL: FHM-10GE-2SFP

### Characteristics

The FHM-10GE-2SFP interface board is the abbreviation of the universal interface unit. It provides up-link and expansion ports for the system. The interface board has two 10GE SFP+ interfaces.

Specification

Model	FHM-10GE-2SFP
Feature	Feature
Basic functions	Support hot swap
	Support temperature and voltage detection
Interface	2*10GE SFP+
	supports full duplex or adaptive mode
	Support inner loopback and outer loopback
	Support flow control
	Support two-layer and three-layer working modes
clock	Support physical layer clock synchronization (Ethernet clock synchronization)
	Support 1588v2
	Support 1588 ACR
weight	0.35Kg
