

R2T – Mini & Robust Remote 2-Channel

The RADIUM 1, 2 and 4 buttons key chain style remotes are operating at 433,92 MHz. It has been designed for the control of automatic closing systems and anti-burglar systems, thanks to its very high security coding system (KeeLoq® Hopping code). The code sent by the transmitter changes at each activation, avoiding any scanning and copying risk. A special algorithm allows to keep synchronized transmitter and receiver. The transmitter can be equipped with passive tag.

Technical Specifications:

- Heavy-duty construction
- Range up to 250 m (820 ft)
- Battery: Two 3V lithium battery (CR2016)
- Also available with built-in proximity tag:
 - **R2TC**: CDVI Tag
 - **R2TH**: HID Tag
 - **R2TMI**: Mifare Classic 1k Tag
