

DS-TDSB0G-FX/1km 1 km Security Radar

DS-TDSB0G-FK/1km security radar, which adopts with radar technology including phased array technology, low-power FMCW modulation technology, is ideal choose for intrusion detection even in challenging conditions like darkness, fog and moderate rainfall. It can also support multi-target positioning, tracing and linking cameras for tracking and recording. Besides, the embedded deep learning algorithm in radar can be also used to detect interested objects only for human and vehicle base on the video stream from linked camera. It is recommend to be used in the prison, power station, railway, museum, airport and other security place.

- Supports getting information such as the distance, speed, and angle of the object.
- Supports target locating and trace following.
- Multi-target locking and multi-dimensional videos linkage.
- Multi-scene modes selectable. Sensitivity configurable.
- Local videos analysis recheck and pictures capture to filter the false alarms such as the swaying trees and pets.
- Supports 32 targets detection, 16 detection zones, and 4 warning lines.
- Strong environment adaptability with 24/7 all-weather working properly.
- Water and dust resistant (IP67) and vandal proof (IK10).
